Pro Shop Millwork & Design
63085 NE 18th, Ste. 1
Bend, OR 97701

To Whom It May Concern:

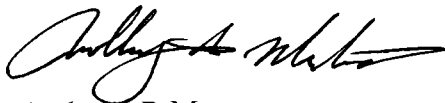

I am taking the opportunity to provide a letter of reference for Pro Shop Millwork & Design. As a partner on the project, Pro Shop Millwork & Design helped make our project a success. Pro Shop was responsible for custom casework for a hospital tenant improvement project that included 12 patient rooms, 6 room critical care unit, and hospital user space. This project included fast track schedule, high end finishes, and patient care modules that required close coordination with electrical, low voltage, and medical gas scopes of work.

This was the first project that our two companies have worked together and their success of the cabinetry scope can be justified by their ability to expedite submittals and shop drawings, procure material, bring questions, concerns, and most of all solutions to the table. Pro Shop was able to meet schedule and cost while working in an operational hospital facility around care givers and patients. They have ensured that they are capable of working in the heart of a high profile project.

To expand, the management team from Pro Shop worked closely with all project members "General Contractor & Architect" and onsite trades to coordinate work without hesitation. The professionalism and willingness "to get the job done" attitude portrayed by Pro Shop is one that clients can expect from a contractor.

Pro Shop maintains a very professional working relationship and is valued as a team member. We look forward to working with Pro Shop Millwork & Design on many more opportunities in the future.

Sincerely,

Anthony R Morton
